New Forest Log Homes—The Natural Choice

www.newforestlogcabin.co.uk - 01202 888108

Introducing a complete range of high quality solid log Eco Friendly Log Homes.

Log Home Introduction

Ordering your new Log Home from New Forest Log Homes ticks all the environmental boxes with construct time to a matter of weeks, instead of months with a traditional build method.

Our Log Homes have been thoroughly tested by a number of over the years and have proven thermal benefits, fire safety, air-tight, energy efficient and durability tested by many customers throughout the UK.

New Forest Log Cabins have been independently certified and in all cases have exceeded the minimum U-values proven to save households between 30 to 40% on heating, cooling and lighting.

Log Homes

“As concern for the environment increases almost day by day there is a growing demand for Eco-friendly Log Homes designed to ensure that there is as little effect as possible on the environment and be very energy efficient to run and maintain. It is also essential for Eco-Friendly Log Buildings use only renewable sources of timber to lessen the effect for their production on the world. The Carbon Footprint of our Log Homes is kept to an absolute minimum from the time the log is cut to delivering it to you and like everything else these days it’s the haulage cost that adds the carbon, otherwise our products would be almost 100% Carbon Neutral.”

New Forest Log Homes

Why are Log Homes so popular...?

It's comforting to know that New Forest Log Homes are building Log Houses, Chalets and Mobile Lodges and what's more, they are extremely Energy Efficient and are fantastic places to live, holiday or enjoy as a second home for family, friends or even as a Annex for middles aged or elderly relative.

So those are just a couple of plus points as to why you should consider a Log Building from New Forest Log Homes as an alternative to conventional brick or temporary outdated buildings. But that's not all, the big benefit is that they cost 30% less to build than a conventional brick buildings, cost 30% less to heat and are extremely Eco Friendly with the wood coming from sustainable sources which all helps to keep the Carbon Footprint as low as possible.
